

## Frames

### ✓ Professional use

- Available in three widths (0.75, 0.90 and 1.35 metres)
- Suitable for the MiTOWER, RS4 and RS5
- Available in various lengths

## Altrex frames: All types and sizes available

You will reach any required height using the frames of Altrex. Available in versions from two rungs to seven rungs. The 4-rungs frames are 1 metre high and with a 7-rungs frame, you have a frame of 2 metres. The rungs have an anti-slip profile and have a rung distance of 28 centimetres. The rung distance of a MiTOWER frame is 25 centimetres.

All Altrex frames are welded all around. The frames of the RS TOWER 5 series have a patented locking pin system. This locking pin system ensures that the locking pin is always fixed, so that you can never lose it. The frames have uniquely flexible collar tubes, ensuring that the frame will always fit. In addition, all frames have double holes for the locking pin to guarantee quick mounting.

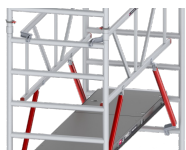

### Collar tubes

The collar tubes have caps to prevent fouling. In addition, the collar tubes are flexible, so that the frames fit better.

### Reinforces bottom side

The bottom side of the frames are reinforced by a ring, which guarantees the fit. Furthermore, the locking pins have a transport position and a usage position, allowing quick mounting.

### Available in a multitude of widths

The frames are available in various widths. In addition to the standard 75 and 135 cm versions, the 90 cm frame is also an option. The 90 cm frame provides additional work space compare to the 75 cm frames.

## Product specifications

Item number	EAN	Description	series	width
301104	8711563106680	Frame single width 75-4 RS TOWER 5	RS TOWER 5	75
