

Velocity folding ladder

✓ Professional use

- For intensive, professional use
- Telescopic adjustable, ideal for uneven surfaces
- Stable due to flared beams

Velocity. Telescopic folding ladder for the professional

The Velocity is a telescopic folding ladder. You can use the folding ladder in A-position or in the ladder position. The ladder can be adjusted telescopically, so that you can use it easily on an uneven floor, e.g. in a stairwell. Furthermore, the fixed wheels allow you to easily move the folding ladder. Tackle any professional task with the Velocity.

The horizontal standing area with anti-slip profile provides comfort. With the flared beams, you are always safe and stable. The self-blocking hinge locks the ladder into any position. Guaranteed safety!

Multifunctional and telescopic

The Velocity folding ladder can easily be changed to another position. Also ideal on uneven floors due to the telescopic mechanism.

Stable and secure

Flared beams mean you are always sturdy and stable. No matter which position you use.

Compact and easy to store

When folded, the ladder takes up very little room. It will fit into any van. Wheels make transport easy.

Multiple positions, different heights

Position the folding ladder in the desired position so that you can reach the height you need to complete your job.

EN 131
