

RS TOWER 24 single width folding tower

✓ Private use

- Single width rolling tower, fits through every standard door opening
- Simple and quick assembly
- Foldable and therefore, very compact

RS TOWER 24 – Folding tower for the do-it-yourselfer

The RS TOWER 24 is a stable light-weight folding tower suitable for jobs in and around the house. In addition, the folding tower is ideal for chores at home due to its compact format. The working height is maximum 2.60 metres. The folding tower is constructed especially for daily chores. The platform load is maximum 150 kg/m².

The folding tower fits through any every standard door opening due to its single width frame of 0.75 metres. The platform is available in a length of 1.50 metres. Constructed with the foldable part in the frame of the folding tower, you have no loose components and you fold the folding tower in its entirety. This way, it hardly takes up room.

Foldable, light-weight and compact

The RS TOWER 24 is light-weight. Due to the foldable part in the folding tower, you fold it simply and compactly.

Easy to transport

This narrow folding tower fits through any door opening and it can be transported easily due to its compact format. It is the folding tower to take anywhere, so that you can always work safely in and around the house.

Double braked wheels

The wheels of Ø 100mm are double-braked, providing you with extra security when you stand on it. In addition, the wheels are synthetic and therefore, do not leave marks on the floor.
