- Double width folding-/rolling tower, large working surface
- Further extension possible, also in Safe-Quick® version
- Foldable and adjustable in length
- Can be combined with all components from the RS TOWER 5-Series
- Wooden or lightweight Fiber-Deck® platforms

RS TOWER 55 double width Folding tower with extension options

The RS TOWER 55 is a handy folding tower with a large working surface area. Suitable for in- and outdoor use. Want to go higher? The system can be extended with components from the RS TOWER 5-series. This allows you to easily extend the folding tower to a working height of 13.80 metres.

Its wide frame of 1.35 metres means this folding tower is ideal for a 2-person job. Foldable folding frame of the scaffold means there are very few separate parts and the whole thing folds in half. The folding frame is also telescopic so that you can use platforms at heights of 1.85, 2.45 or 3.05 metres. The frames from the 5-series are equipped with rungs with a wall thickness of 2 mm. This makes the RS TOWER 55 the strongest folding tower.

Foldable and compact
The RS TOWER 55 has a folding frame in the scaffold. The frame of the folding tower has no separate parts and folds completely in half. It takes up little space for storage.

Further assembly possible
The RS TOWER 55 is a handy, basic folding tower, but it can also be extended to a working height of 13.80 metres. If necessary.

Wooden or lightweight platforms
The system is supplied with wooden or lightweight platforms. Fiber-Deck® platforms are 30% lighter and make assembly and disassembly even easier.

Integrated wind security system
The innovative wind lock hook makes erecting and dismantling faster and easier. The wind security system is integrated into the unique design.

Wheels with rubber tread
The (Ø 125 mm) wheels on the folding tower have rubber treads. This makes the system suitable for indoors.

Your RS TOWER, your identity
Make your RS TOWER stand out with your company's colours. All-round visibility at every level.
