

Safety Step stepladder

✓ Professional use

- Small but robust
- Extra-large treads, improve standing comfort
- With handy tool tray

Safety Step - Single-sided. The robust and user-friendly stepladder

The Safety Step is a robust stepladder. Easy to use and offering optimum comfort. The treads are fitted with extra big treads with a rubber, anti-slip profile. So you'll always be comfortable. The treads gradually increase in height. This allows you to ascend and descend safely.

The Safety Step has two wheels at the back - handy if the stepladder needs to be moved. The safety guardrail gives you extra grip. You also have the tool tray on top of the guardrail, giving you somewhere to store your tools (except the 2-step version).

Optimum standing comfort

You'll stand comfortably on the Safety Step. This is due to the extra big treads that are finished with anti-slip rubber profiles.

Stable and secure

Large anti-slip feet provide reliable stability. Greater certainty, greater safety.

Safe and functional

The safety guardrail offers space for your tools. And you have additional grip once you stand on the top step.

EN 131
